

TOUPRET®

FILLERS FOR PROFESSIONALS

March 2022

Tough Multi-Filler, Toupret`s hardworking product for pros

Toupret, the professional`s choice for quality wall fillers, has reinforced its **exterior surfaces** collection with the launch of its **Tough Multi-Filler**.

The **Tough Multi-Filler** is a versatile and practical product, ideal for tradespeople who work to tight timelines, as it can be used for filling, repair work and localised skimming on exterior substrates.

As the warmer weather arrives, attention is turning to outdoor jobs as customers look to transform the exteriors of their homes. Toupret`s **Tough Multi-Filler** is a strong, hardworking, and multi-purpose product that every professional should have in their van.

The [Tough Multi-Filler](#) product comes in powder form and can be used for repairing and localised skimming as well as filling. It is reinforced with fibres, which give it excellent adhesion and super tough properties for all of these applications.

It's fibre-reinforced formula provides exceptional adhesion and strength. This makes it suited to a wide range of exterior surfaces such as cement, concrete, breeze blocks, bricks, stone, glass and ceramics, whether new or renovated, painted or unpainted.

In spite of its toughness, **Tough Multi-Filler** is also surprisingly easy to sand, making it the perfect all-round product for professional builders that need to deliver quality results, quickly.

Toupret advises a working time of 40 minutes and it is ready to paint in 24 hours. It's also a breathable product and you can covercoat it with any standard water-based masonry paint or mineral paint (if using polyurethane or epoxy solvent-based paints, first prime with a water-based exterior paint).

Available in a 2kg box or 5kg and 10kg bag for even the largest of jobs.

What Carlsberg is to beer, Toupret is to fillers. As such, Toupret currently offers the widest range of exterior fillers on the market with quality results guaranteed by high-performance products.

The **exterior surfaces** collection consists of fillers for outside substrates across filling, repairing, formwork, and skimming jobs. Each product is uniquely designed to target gaps, cracks, and damaged exterior walls and surfaces. The updated exterior collection now consists of six products in both ready mixed and powder options; **Tough Multi-Filler**, **Masonry Repair Filler**, **Rock Solid Repair Filler**, **Skimcoat Filler**, **Ready To Use Skimcoat Filler**, and **Quick Fill**, meaning there really is a Toupret product for every exterior filling or skimming job.

Toupret's **exterior surfaces** products are available to purchase from trade distributors nationwide.
