Toupret announces a range of high-performance wood fillers: Wood Filler and Wood Repair Filler

Following on from its successful Joint, Skim & Fill launch in July, Toupret has announced its game changing range of fillers for wooden surfaces. Consisting of ready to use **Wood Filler** and powder **Wood Repair Filler**, Toupret's wood range is a must have for any professional and has developed quite a following in the trade.

Toupret's ready to use **Wood Filler** and **Wood Repair Filler** are products that tick all the boxes; easy to apply and sand, can be drilled and screwed and create a high-quality finish. Both products are low odour, can be used on all types of wood, including exotic species, chipboard or plywood, are compatible with any conventional paint, varnish or stain, and are perfect for interior or exterior use.

Toupret's **Wood Repair Filler** is Toupret's 21st Century take on a two-part filler. Simply add the powder to water for a durable, versatile product with a high quality finish.

There are several advantages of using powder **Wood Repair Filler** over a 2-part wood filler. It has a longer working time of around 30 minutes (great for perfecting tricky fill, repair and shaping jobs without rushing), is quick drying, can be ready to paint in three hours, doesn't flash, is as durable as a 2-part and can take drilling & screwing, yet it's very easy to sand. It has almost no odour, so is really convenient for use on jobs

indoors as well as outside. It can also be used for repairs without the need for formwork, and you can get your tools clean afterwards with just water, rather than using solvents. Toupret's **Wood Repair Filler** is available in 1kg and 2kg boxes.

Toupret's **Wood Filler** is a ready to use product, perfect for small repair jobs that need to be completed quickly, without compromising on the finish. It can be applied manually from the bucket or tube, cutting out mixing time completely. Whether you're restoring or repairing, this product has an unlimited working time and can be ready to paint in just 12 hours. Available in a 330g tube or 1.25kg tub.

Toupret's range of products for wooden surfaces is completed with Wood Hardener, a deep penetrating water-based hardener for toughening rotten wood before filling or overcoating, as well as Glazing Putty, a long-lasting product, compatible with all paints and coatings that will not smear glazing and doesn't stick to your hands.

Stockists:

Toupret's **Wood Filler** and **Wood Repair Filler** products are available to purchase from trade distributors nationwide.
