

ROLLER SMOOTHING

**LEVELLING
& FINISHING**
ROLL ON...

TOUPRET®
FILLERS FOR PROFESSIONALS

The roller revolutionised the way we paint. And now it's changing the way we prep: saving time and achieving a great finish as an applicator for skimming and finishing fillers, enabling faster smoothing, backing and levelling of walls and ceilings.

Specific rollers now exist for use with fillers for skimming and smoothing, but it is also possible to carry out the job to a professional standard with either a short or medium pile paint roller.

With a good amount of filler on the roller, filler can be applied just like paint and then smoothed out with a skimming blade, creating a level surface that's ready for painting.

WHICH PRODUCTS CAN I ROLL WITH?

All Toupret levelling and finishing products can be applied with a roller.

For the smoothest job, add about 2% more water than recommended on the packaging to powder fillers. Ready mixed fillers can be applied straight from the tub or after a little dilution with water.

INTERIOR SURFACES

FINE SURFACE FILLER

For fine smoothing over small defects

- Adheres to paintwork
- Easy to sand
- No need to spot prime
- Will not flash or grin

Ready to roll,
no dilution required

RENOVATION SKIMCOAT

For levelling & finishing damaged & textured surfaces

- Ideal for covering textured and rough surfaces
- Certified for plasterboard jointing
- No PVA required, no need to spot prime
- Easy to sand

To roll, dilute
with a little water

PLASTERBOARD FINISHING

JOINT FILLER 3 HOUR

For plasterboard jointing with a 3 hour working time

- 3 hour working time
- Adheres to painted surfaces
- Easy to sand
- Suitable for patching

To roll, dilute
by a further 2%

FINISH FILLER

Ready to use finishing surface filler for plasterboard

- Easy to sand
- Excellent finish
- No need to spot prime
- Smooth application

Ready to roll,
no dilution required

PLASTERBOARD FINISHING

JOINT, SKIM & FILL

For surface finishing, filling & plasterboard jointing

- One coat*
- Easy to sand
- No shrinkage, no depth limit
- No need to spot prime

To roll, dilute
by a further 2%

*Difficult applications may
need more than one coat.

JOINT & SKIM

For surface finishing & plasterboard jointing

- Easy to sand
- Smooth application
- No need to spot prime
- For manual or spray application

Ready to roll,
no dilution required

EXTERIOR SURFACES

SKIMCOAT FILLER

For smoothing damaged & rough masonry & render

- Extra smooth
- Easy to spread
- Long working time
- Allows the substrate to breathe
- No need to seal the substrate*

To roll, dilute by a further 2%

READY TO USE SKIMCOAT FILLER

For smoothing damaged & rough masonry & render

- Easy to spread
- Flexible – resists cracking
- Manual or spray application
- Allows the substrate to breathe
- No need to seal the substrate*

To roll, dilute with a little water

*Ensure the base substrate is hard, cohesive, clean, sound and dry.

PROBLEM SURFACES

SKIM-FLEX

Flexible skimcoat for moving & tiled substrates

- Exceptional adhesion, even on tiles
- Ideal for kitchens & bathrooms
- Easy to spread & sand
- Remains flexible when dry

To roll, dilute with a little water

ANTI-DAMP RENDER

Breathable barrier for damp, porous & untreated masonry

- Ideal for basements & garages
- Exteriors: blocks water penetration
- Interiors: acts as a water barrier, while letting substrates breathe
- No need to seal the substrate*

To roll, dilute by a further 2%

*Substrates to be treated must be stripped down to the masonry before application.

AT YOUR SERVICE

TRAINING & PROJECT SUPPORT

- For information on future demonstration events or for specific training or advice, contact our office and we will direct you to one of our technical field team.

TECHNICAL ASSISTANCE

- For urgent technical or commercial questions, contact our expert customer support: projects specifications, product features, standards, arranging visits or meetings at your local merchant: toupretuk@toupret.com or **0208 916 2134**.
Monday to Friday 9am to 5pm.

ONLINE SUPPORT 24/7
